

LEKA

“At the Leka restaurant we are a great team with ethical and evolutionary intentions, committed to healthy eating, responsible consumption, sustainability and respect for the environment.

Our mission, vision and values are to offer our clients a healthy raw material, betting on quality, ecological, sustainable and proximity products.

For this reason, among other things, we use products that are in season, we work with products free from additives, medicines and preservatives, we prioritize having products of km0, we reduce environmental impact with the majority use of bulk and plastic-free products, and we take advantage of the inevitable organic waste, to create compost for the garden, to produce our own soaps and to make animal food from our brand Circular Gos.

Furthermore, we select our suppliers with the requirement that they share our philosophy; committed to respect the environment and with the desire to provide healthy and quality raw material”.
